

Wonder Classroom

Wonder Classroom was a project that involved 4 of the C Change schools that are based in Ellesmere Port. Working in partnership with Theatre Porto, we commissioned a creative practitioner to work with each school over 5 days. Schools chose how to use those 5 days with the focus on two key aims.

- To explore the most effective ways for schools and creative partners to work together to develop teachers' creative pedagogies in the classroom
- To develop the creative habits of the children by looking at the curriculum through a different lens, in particular the use of immersive/creative spaces

At the end of the project, every school was gifted a den kit. They could then use this as a tool to support the creation of immersive spaces in their classrooms.

The impact of this project has been documented and the video will be shared at this year's C Change Conference.
